**THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

**THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

### HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

## **DETAILED ACTION**

### ***Acknowledgement***

1. Acknowledgement is made of applicant's amendment made on 01/02/2009. Applicant's submission filed has been entered and made of record.

### ***Status of the Claims***

2. Claims 1-19 are pending.

### ***Examiner's Amendment***

3. An examiner's amendment is applied to all independent claims as follow:

The text of all pending claims, (including withdrawn claims) is set forth below.

Cancelled and not entered claims are indicated with claim number and status only. The claims as listed below show added text with underlining and deleted text with ~~striketrough~~. When strikethrough cannot easily be perceived, or when five or fewer characters are deleted, [[double brackets]] are used to show the deletion. The status of each claim is indicated with one of (original), (currently amended), (cancelled), (withdrawn), (new), (previously presented), or (not entered).

1. (currently amended) A facsimile use modem apparatus, comprising:  
  
an analog interface formed from a silicon data access arrangement operative to interface with an analog telephone line, said analog interface including an insulation device

configured to insulate a remainder of said facsimile use modem apparatus from said analog telephone line;

a digital interface operative to interface with an ISDN (integrated services digital network) line and configured for G3 communications through the ISDN line;

a signal converting device configured to convert a modem signal used in facsimile communications via the analog telephone line into a first signal used in the ISDN line, and convert a second signal from the ISDN line into a converted signal for use in facsimile communications via the analog telephone line;

a monitoring device located within the silicon data access arrangement and configured for monitoring a progress of the facsimile communications via the ISDN line; and

a data transmitting device operative to transmit linear data to a speaker via the silicon data access arrangement;

a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable ~~wherein~~ said monitoring device located within the silicon data access arrangement ~~is and configured for to monitoring~~ G3 communications executed through the ISDN line.

7. (currently amended) A facsimile apparatus including a facsimile use modem comprising:

an analog interface formed from a silicon data access arrangement operative to interface with an analog telephone line, said analog interface including an insulation device

configured to insulate a remainder of said facsimile use modem apparatus from said analog telephone line;

a digital interface operative to interface with an ISDN (integrated services digital network) line and configured for G3 communications through the ISDN line;

a signal converting device configured to convert a modem signal used in facsimile communications via the analog telephone line into a first signal used in the ISDN line, and convert a second signal from the ISDN line into a converted signal for use in facsimile communications via the analog telephone line;

a monitoring device located within the silicon data access arrangement and configured for monitoring a progress of the facsimile communications via the ISDN line; and

a data transmitting device operative to transmit linear data to a speaker via the silicon data access arrangement;

a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable ~~wherein~~ said monitoring device located within the silicon data access arrangement ~~is and configured for to monitoring~~ G3 communications executed through the ISDN line.

8. (currently amended) A network connecting a facsimile apparatus having a facsimile use modem comprising:

an analog interface formed from a silicon data access arrangement operative to interface with an analog telephone line, said analog interface including an insulation device

configured to insulate a remainder of said facsimile use modem apparatus from said analog telephone line;

a digital interface operative to interface with an ISDN (integrated services digital network) line and configured for G3 communications through the ISDN line;

a signal converting device configured to convert a modem signal used in facsimile communications via the analog telephone line into a first signal used in the ISDN line, and convert a second signal from the ISDN line into a converted signal for use in facsimile communications via the analog telephone line;

a monitoring device located within the silicon data access arrangement and configured for monitoring a progress of the facsimile communications via the ISDN line; and

a data transmitting device operative to transmit linear data to a speaker via the silicon data access arrangement;

a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable wherein said monitoring device located within the silicon data access arrangement is and configured for to monitoring G3 communications executed through the ISDN line.

Support of said limitation is found in at least the example of Page 8, Line 26 – Page 9, Line 7 of the specification.

Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with applicant's representative of record Paul Teng on 02/23/2009.

*Allowable Subject Matter*

**4. Claims 1-19 are allowed for the following reasons:**

The closest prior art of record *Shimoosawa (US 5418625 A)* discloses a facsimile apparatus having a ISDN connection and a PSTN connection for communication facsimile data in G3 mode through the ISDN connection (**Col 2, Rows 23-43**). However, there is neither disclosure for a silicon data access arrangement nor suggestion for a system side device connecting said silicon data access arrangement for monitoring said G3 communication through the ISDN connection. Therefore, the reference does not disclose a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable said monitoring device located within the silicon data access arrangement to monitor G3 communications executed through the ISDN line.

*D'Angelo (US 7330544 B2)* and *Rahamim (US 6351530 B1)* discloses silicon data access arrangement and suggestion for use of said silicon data access arrangement (See **examiner's citation in office actions**) in connection with DSP chips in a system side device. For example, *D'Angelo (Col 14, Rows 14-45 and see Fig 2)* discloses a modem solution to

isolate silicon DAA from system side device. However, there is no teaching for a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable said monitoring device located within the silicon data access arrangement to monitor G3 communications executed through the ISDN line. While *Rahamim* does disclose silicon DAA connected to a system side circuitry that allows a call progress monitoring of transmission through a telephone line (**Col 6, Rows 20-26**), it does not suggest this configuration can be modified to monitor G3 communication executed through a ISDN line. Therefore there is no teaching for a system side device connecting the silicon data access arrangement and the digital interface that enables transmission of signal through an insulation condenser to thereby enable said monitoring device located within the silicon data access arrangement to monitor G3 communications executed through the ISDN line.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be labeled "comments on statement of reasons for allowance".
